## EDUCATION

### Vellore Institute of Technology

Integrated M.Tech in Computer Science & Engineering (Data Science)

Oct 2022 – May 2027

CGPA: 8.37/10

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL

**AI & Deep Learning:** Neural Networks, GANs, LLMs, Prompt Engineering, RAG (fundamentals)

**ML Libraries:** PyTorch, XGBoost, NLTK, Pandas, NumPy

**Data :** ETL, Data Cleaning, Feature Engineering

**Tools:** MySQL, Tableau, Power BI, GitHub, Streamlit, ChatGpt , Claude , Github Copilot

**Certificates:** IBM AI Engineering Specialization, IBM Data Analyst Professional, Introduction to Data Science

## EXPERIENCE

### Vaighai Agro Products

Jul 2026 – Present

*Data Engineer Intern*

- Analyzed a 456-deal CRM dataset to identify pipeline health risks, finding 63.6% of deals with missing key fields, 93.2% overdue deals, and the top 5% of deals contributing ~67% of total pipeline value.
- Designed a data-backed CRM health scoring framework combining contact inactivity, overdue close dates, and normalized deal value into Healthy, Watch, Warning, and Critical tiers; derived 14/30-day contact and 6L/15L value thresholds from observed data patterns.
- Implemented an automated pipeline monitoring engine using Power Automate and Dynamics 365 to process open opportunities daily, calculate health scores, route severity-based alerts through Teams/Outlook, write scores back to CRM, and maintain audit/error logs.

### ThinkAI India Consulting Pvt. Ltd.

Nov 2025 – Jan 2026

*Python / ML Developer Intern*

- Built a real-time warehouse surveillance system using YOLO-based deep learning (YOLOv8/v11 neural architectures) in Python to detect PPE compliance - hard hats and safety jackets at frame level.
- Curated and annotated a custom dataset of ~100 warehouse images, translating safety requirements into structured ground-truth labels for neural network training and validation.
- Benchmarked YOLOv8 vs. YOLOv11 on live video feeds through systematic model evaluation; identified YOLOv11 as the superior architecture based on detection accuracy, directly informing the final deployment decision.

### Sabudh Foundation

Jan 2025 – Jun 2025

*Software & Data Engineering Trainee*

- Developed an end-to-end Generative AI pipeline using 3D GANs for facial reconstruction, leveraging deep learning-based generative modelling to synthesise realistic 3D facial outputs from 2D image inputs.
- Built a data preprocessing pipeline in Python to clean and structure 2,500+ face images from a Kaggle dataset, reducing data loading time by 15% through efficient batching and handling techniques.
- Validated generated 3D outputs through systematic testing and iterative refinement across structured weekly feedback cycles, resolving edge-case generation failures to ensure consistent model performance.

## PROJECTS

### Fake Job Detector: NLP-based Fraud Detection | [GitHub](#) | [Live Demo](#)

Jan 2026 – Mar 2026

- Engineered a fraud detection system over 17,880 job postings using NLP pipelines and TF-IDF text embeddings to extract semantic representations from multi-field job text (title, description, requirements); flagged 866 fraudulent listings with 98% accuracy using XGBoost.
- Benchmarked 4 ML classifiers prioritising F1-score to handle 95/5 class imbalance; achieved 82% F1-score on the fraud class, outperforming baseline Logistic Regression by 14%.
- Shipped a production Streamlit app with sub-second inference, probability-based confidence scoring, and automated red-flag keyword detection deployed on Streamlit Cloud and version-controlled via GitHub.

### SOIL SYNC: Predictive Soil Fertility Analysis | [GitHub](#)

Jan 2025 – Mar 2025

- Built an end-to-end IoT-ML pipeline in Python to process soil sensor data and classify soil fertility, achieving 85% prediction accuracy using Random Forest and Logistic Regression.
- Engineered data preprocessing, model evaluation, and **interactive Tableau dashboards** to transform soil-health metrics into actionable insights for agricultural planning and soil monitoring.

## EXTRA CURRICULAR

**Amazon ML Summer School 2026:** Selected among 3,000 students from 1.3L+ registrations nationwide for Amazon's competitive ML program.

**Data Science Club, VIT Bhopal:** Core member; co-organised a 24-hour intercollege hackathon attracting 150+ participants.

**Robin Hood Army:** Volunteered in community welfare drives, coordinating food distribution and on-ground logistics.
